DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hirabayashi et al (US 5,436,225; 7/25/95) in view of Manabe et al (US 5,346,879; 9/13/94). Hirabayashi teaches a method of applying a plant growth regulator composition comprising ammonium chloride (lipophobic plant nutrient) and mineral oil (lipophilic solvent) to a plant in order to control growth of the plant. See abstract, claim 1. Hirabayashi does not teach the method comprising a cationic emulsifier. However, Manabe teaches a method of applying a plant growth regulator composition comprising alkyltrimethylammonium chloride (cationic emulsifier). See column 16 lines 36-50. It would have been obvious to one having ordinary skill in the art to modify the invention taught by Hirabayashi to include the alkyltrimethylammonium chloride taught by Manabe. One would have been motivated to do this since both inventions individually teach methods of regulating plant growth. With respect to the amounts of ingredients, it would have been obvious to one having ordinary skill in the art to determine the optimum amount of ingredients. One would have been motivated to do this in order to develop a composition that would have been most effective in controlling plant growth.

Allowable Subject Matter

Claims 34-38,41-45 are allowable for reason on record.
